Qp (.de: 93490

## University of Mumbai

**Examinations Summer 2022** 

Program: Electronics & Telecommunication Curriculum Scheme: Rev 2019\_C Scheme

Examination: TE Semester VI

Course Code: ECC 602 Course Name: Computer Communication Network (CCN)

Time: 2 hour 30 minutes

Max. Marks: 80

| Q1.       | Choose the correct option for following questions. All the Questions compulsory and carry equal marks |  |  |
|-----------|---|--|--|
| 1.        |   |  |  |
| OptionA:  | Fiber optical cable   |  |  |
| OptionB:  | Coaxial cable   |  |  |
| OptionC:  | Copper wire   |  |  |
| OptionD:  | Wireless LAN  |  |  |
| 2.        | Errol control and flow control are the functions of the following layer of O model.                   |  |  |
| Option A: | Application   |  |  |
| Option B: | Session   |  |  |
| Option C: | Data link layer   |  |  |
| Option D: | Presentation  |  |  |
| 3.        | work at the network layer of the OSI model.   |  |  |
| Option A: | Bridges   |  |  |
| Option B: | Hubs  |  |  |
| Option C: | Routers   |  |  |
| Option D: | Gateways  |  |  |
| 4.        | Which of following protocols is used by IP for generating error reports                               |  |  |
| Option A: | ICMP  |  |  |
| Option B: | IGMP  |  |  |
| Option C: | IGRP .  |  |  |
| Option D: | ARP   |  |  |
| 5.        | device is used to regenerate the signals at physical layer.   |  |  |
| Option A: | Repeater  |  |  |
| Option B: | Switch  |  |  |
| Option C: | Bridge  |  |  |
| Option D: | Router  |  |  |
| 6.        | Which of the following is not an application layer protocol   |  |  |
| Option A: | IP  |  |  |

Find the class of address 14.23.120.8.

**SMTP** 

HTTP

DNS

Option B:

Option C:

Option D:

| Carlo Carlo | Class A   |  |  |
|-------------|---|--|--|
| Option A:   | Class C   |  |  |
| Option B:   | Class B   |  |  |
| Option C.   | Class D   |  |  |
| Option D:   |   |  |  |
|             | Telnet is used for  |  |  |
| 8.          | Telnet is used for Assigning IP address to a host                       |  |  |
| Option A:   | Assigning   |  |  |
| Option B:   | Remote Login Assigning name to an IP address                            |  |  |
| Option C:   | Assigning name to   |  |  |
| Option D:   | Video Compression   |  |  |
| Ориг        | Which of the following layers support process to process communication? |  |  |
| 9.          | Which of the following layers say:                                      |  |  |
| Option A:   | Network layer   |  |  |
| Option B:   | Data link layer   |  |  |
| Option C:   | Session layer   |  |  |
| Option C:   | - and lower   |  |  |
| Option D:   |   |  |  |
|             | Which of the following protocols provides email service?                |  |  |
| 10.         |   |  |  |
| Option A:   | HTTP  |  |  |
| Option B:   | SMTP  |  |  |
| Option C:   | FTP   |  |  |
| Option D:   | TFTP  |  |  |
|             |   |  |  |
|             |   |  |  |

| Q2   | (20Marks Each)  |
|------|---|
| A    | Solveany Two 5markseach   |
| i.   | Explain in detail Digital Subscriber Line (DSL).                        |
| ii.  | Compare logical address and physical address.                           |
| iii. | Explain the OSI-reference model and functions of each layer.            |
| В    | SolveanyOne 10 marks each   |
| i. : | Explain the different error reporting messages in ICMP with message for |
| ii.  | Compare IPv4 and IPv6   |
|      |   |

| Q3   | (20 Marks Each)  |
|------|--|
|      |  |
| Α    | Solveany Two 5 marks each  |
|      | The following is the dump of TCP header in hexadecimal format:05320017 00000001 00000000 500207FF 00000000                     |
|      | 1) What is the source port number?   |
|      | 2) What is the destination port number?  |
|      | (3) What is the sequence number?   |
|      | 4) What is the acknowledgement number?   |
|      | (3) What is the length of the header?  |
| ii.  | Differentiate between Bus Topology and Ring Topology   |
| 111. | Explain Three-Way Handshaking for connection establishment in TCP  Solve any One   |
| В    | Solve any One  |
| i    |  |
| ii.  | Explain HDLC frame format and the control frames with neat diagrams.  Classification of the control frames with neat diagrams. |
| 11.  | Classify transmission media. List the applications of each. Compare Twisted pair   |

7873162B79775C39DDCAB40D2C2157E3

|      | cable, Coaxial cable and Fiber optical cabl   | IC.           |  |
|------|---|---------------|--|
|      |   |               |  |
| Q4   | (20 Marks Each)   |               |  |
| A    | Solve any Two   | 5 marks each  |  |
| i    | Explain Selective Repeat ARQ.   |               |  |
| ii.  | Explain the transition states of DHCP with a neat diagram.  |               |  |
| iii. | Compare RIP and OSPF unicast routing protocols.   |               |  |
| В    | Solve any One   | 10 marks each |  |
| 1.   | An ISP is granted a block of addresses starting with 160.100.0.0/16. The ISP needs to distribute this address to three groups of customers as follows:  Group I: The first group has 64 customers and each needs 256 addresses.  Group II: The second group has 128 customers and each needs 128 addresses.  Design the subblocks and find out how many addresses are still available after these allocations.  Group III:128 customers each need 64 addresses  Design subblocks and give slash notation for each sub block. Find how many addresses are still available after this allocation. |               |  |
| ii.  | What are the Hardware network devices? Explain any four in details.   |               |  |
